CORRUGATED TECHNICAL INFORMATION

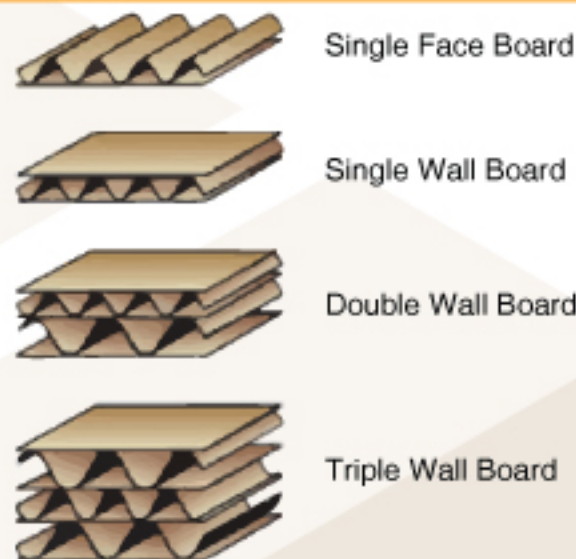

- 1 Regular Slotted Carton (RSC)**
Most common shipping box that is easily assembled where the flaps can be taped shut.
- 2 Center Special Slotted Container (CSSC)**
A very strong box since all flaps meet at the center creating a double layer of the thickness of the corrugated board.
- 3 Full Overlap (FOL)**
The flaps on this box extend from one side to the other, making it an excellent box for heavy objects or rough handling.
- 4 Half Slotted Carton (HSC)**
The bottom is the same as an RSC box but with no top flaps. These boxes can be provided with a lid for a top cover.
- 5 Five Panel Folder (FPF)**
A five-panel folder is an unglued corrugated box used for packaging large items and oddly shaped items.

- 6 Tray**
Perfect for transporting small, lightweight loads. Easy-to-fold sides provide additional stability.
- 7 Pad**
Corrugated cardboard sheets or pads are used extensively in shipping and packaging to protect or divide the contents within a carton or box.
- 8 Scored Divider Panels (SDP)**
Corrugated panels made to separate and protect products within a shipping container.
- 9 Full Telescope Half-Slotted Box (FTD)**
Body Two-piece box, both sections of slotted style. Full depth cover.

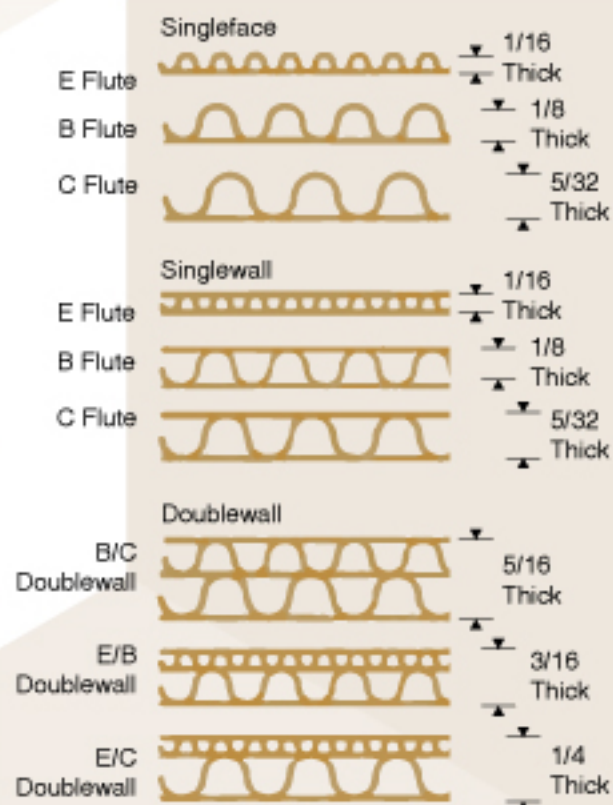

ADDITIONAL PRODUCTS

- Heat Seal Barrier Bags
- Film Foil Bags
- Fabricated Foam
